WHAT IS INSIDE

- **Week 1, complete**
  both taught lessons with tasks and full answers
- **The practice hour**
  question bank extract with answers
- **Retrieval starter, week 1**
  five questions with answers
- **The year map**
  all six units and every assessment point
- **From the full product**
  every week of the year is built like this one

TRY ONE WEEK FREE | THE FULL YEAR IS BUILT LIKE THIS

Edexcel 9BS0 and AQA 7132. Both codes on every lesson.
Year 12, the first year of the A-level.

HOW THIS YEAR WORKS — READ THIS FIRST

This is a full teaching year for A-level Business: 30 weeks, planned at three timetabled hours a week. Every week has two taught lessons, written out on one page each with objectives, timings, a main task and full answers, and a third hour that runs on the unit question bank, the weekly retrieval starter and, at the end of each unit, the unit assessment. Everything needed for the third hour is inside this pack, so the year holds together without any other resource. The Word version makes every page editable, and the PowerPoint carries all 30 retrieval starters with answers, ready to project.

WHICH SPECIFICATION IS THIS FOR?

Edexcel 9BS0, all cohorts. Pearson has confirmed that 2026 starters continue on the current specification. This pack covers Themes 1 and 2 in full, the Year 12 half of the A-level, with theme codes on every lesson.

AQA 7132. Every lesson carries its 7132 section reference, 3.1 to 3.6, which is the Year 12 content. Sections 3.7 to 3.10 belong to the second year and are not part of this pack.

Teaching both boards. The two specifications cover almost the same ground in a different order. This scheme is sequenced so that either class can follow it straight through: the unit map below shows which board codes sit in each unit, and each lesson page carries both.

THE WEEKLY RHYTHM

Hour	What happens	Where the material is
Lesson 1	Taught lesson. Retrieval starter, then new content with a worked task and full answers.	The lesson page for that week in this pack, plus the starter slide in the PowerPoint.
Lesson 2	Taught lesson. Same shape as Lesson 1, second topic of the week.	The second lesson page for that week.
Hour 3	Practice hour. Students work the unit question bank in timed conditions, then mark from the answers. In assessment weeks this hour is the unit test.	The question bank and the practice hour guide inside each unit, and the unit assessment at the end of it.

THE YEAR AT A GLANCE — ALL SIX UNITS

Unit	Weeks	AQA 7132	Edexcel 9BS0	Assessed by
1. Starting a business	1 to 4	3.1 What is business?	1.5 Entrepreneurs and leaders	Unit 1 assessment, 40 marks, week 4
2. Markets and customers	5 to 8	3.3 Marketing: understanding customers and markets	1.1 Meeting customer needs, 1.2 The market	Unit 2 assessment, 40 marks, week 8
3. The marketing mix	9 to 13	3.3 Marketing: using the mix	1.3 Marketing mix and strategy	Unit 3 assessment, 45 marks, week 13
4. Managing people	14 to 18	3.2 Managers and leadership, 3.6 Human resources	1.4 Managing people, 1.5 leadership content	Unit 4 assessment, 45 marks, week 18
5. Finance	19 to 24	3.5 Financial performance	2.1 Raising finance, 2.2 Financial planning, 2.3 Managing finance	Unit 5 assessment, 50 marks, week 24
6. Operations and the wider world	25 to 30	3.4 Operational performance, external environment from 3.1	2.4 Resource management, 2.5 External influences	Unit 6 assessment, 50 marks, week 30

UNIT 1: STARTING A BUSINESS — WEEKS 1 TO 4

AQA 3.1 What is business?. Edexcel 1.5 Entrepreneurs and leaders

Where the course begins: why businesses exist, who takes the risk, the legal forms the risk can take, and how objectives turn a founder's intention into something a class can measure. The unit closes with the first 40 mark assessment, which doubles as the year's baseline.

Runs on: Unit 1 question bank, retrieval starters for weeks 1 to 4, Unit 1 assessment and mark scheme.

W1L1 · WHY BUSINESSES EXIST — AQA 3.1.1 | EDEXCEL 1.5.1

Objective. Calculate revenue, costs, profit and added value, and explain what business activity is for.

The hour: retrieval starter and review (10 minutes), teaching (20), the task below worked and marked (25), objective checked against evidence (5).

- Needs, wants, and the transaction as the starting point of everything in the course.
- Revenue = price times quantity. Costs split into fixed and variable. Profit is what remains.
- Added value is price minus bought in costs, and it is not profit: it is measured before wages and rent.
- The first habit of the year: every calculated number gets a sentence beginning "This figure suggests".

THE TASK: FERN & FIELD, A FARM SHOP KITCHEN

Fern & Field sells preserves. A typical month: 900 jars at £6.50. Bought in ingredients and packaging cost £2.10 a jar, other variable costs £0.65 a jar, and fixed costs are £2,300 a month.

Item	Figure
Selling price per jar	£6.50
Jars sold per month	900
Bought in cost per jar	£2.10
Other variable cost per jar	£0.65
Fixed costs per month	£2,300

#	Question	Marks
1	Calculate monthly revenue.	(2)
2	Calculate total monthly costs.	(3)
3	Calculate monthly profit.	(2)
4	Calculate added value per jar and in total.	(3)

#	Answer	Working and guidance
1	£5,850	£6.50 × 900.
2	£4,775	Variable £2.75 × 900 = £2,475, plus fixed £2,300.
3	£1,075	£5,850 minus £4,775.
4	£4.40 a jar, £3,960 in total	£6.50 minus £2.10, then × 900. Note it exceeds profit: wages and rent are paid out of it.

W1L2 · THE ENTREPRENEUR, RISK AND OPPORTUNITY COST — AQA 3.1.1 | EDEXCEL 1.5.2, 1.5.5

Objective. Explain what an entrepreneur does, distinguish risk from uncertainty, and calculate an opportunity cost.

The hour: retrieval starter and review (10 minutes), teaching (20), the task below worked and marked (25), objective checked against evidence (5).

- The entrepreneur organises the other resources, carries the committed capital, and decides under doubt.
- Risk: the odds can be estimated. Uncertainty: they cannot. Insurance exists for one of them.
- Opportunity cost is the value of the next best alternative given up, and it is usually a salary.
- Financial and non financial motives sit together: independence and purpose alongside profit.

THE TASK: COUNTING THE REAL COST OF FOUNDING

Asha leaves a £31,000 salary to start a studio, and moves £18,000 of savings, which earned 4% a year, into the business.

#	Question	Marks
1	Calculate the interest Asha gives up in year one.	(2)
2	Calculate her total opportunity cost of the first year.	(2)
3	Explain one non financial motive that might still make this rational.	(3)
4	Risk or uncertainty: a new rival opening next door unannounced? Justify.	(3)

#	Answer	Working and guidance
1	£720	4% of £18,000.
2	£31,720	Salary £31,000 plus interest £720.
3	Model line	Independence, control of her own hours, building something owned rather than rented out to an employer; developed with a consequence.
4	Uncertainty	No basis for odds exists; it cannot be priced or insured, unlike an estimable risk.

THE PRACTICE HOUR, WEEK 1 — FROM THE UNIT 1 QUESTION BANK

The third hour of every week runs on the unit question bank. This is the week 1 extract; the full bank carries twelve questions per unit.

#	Question	Answer
1	Define opportunity cost.	The value of the next best alternative given up.
2	A shop sells 620 units at £9. State revenue.	£5,580.
3	Whose assets are at risk in a sole tradership?	The owner's personal assets: liability is unlimited.
4	Give two features of a plc that a Ltd does not have.	Publicly traded shares; minimum £50,000 allotted share capital; wider disclosure. Any two.
5	A plc has 80m shares at £2.15. Market capitalisation?	£172m.
6	Profit after tax £12m, payout 40%, 96m shares. Dividend per share?	5p: £4.8m ÷ 96m = £0.05.

RETRIEVAL STARTER, WEEK 1 — PROJECT, THREE MINUTES, ANSWERS AFTER

One set opens the first lesson of each week: five questions, three minutes, answers straight after. From the fifth week onward at least one question reaches back to an earlier unit, because memory is built by the return visit, not the first one.

WEEK 1

#	Question	Answer
1	What is the difference between a need and a want?	A need cannot be managed without; a want can.
2	Write the profit formula.	Profit = total revenue minus total costs.
3	Give two costs a new coffee shop pays before selling a single cup.	Rent and equipment; accept insurance, fit out, licences.
4	What does an entrepreneur risk that an employee does not?	Committed capital: money already put into the business.
5	Name the five business objectives named in the AQA specification.	Profit, growth, survival, cash flow, social and ethical objectives.

THE ASSESSMENT CALENDAR OF THE FULL YEAR

Week	Milestone
1	Course opens. Baseline habits set in the first retrieval starter.
4	Unit 1 assessment, 40 marks. First data point for every student.
8	Unit 2 assessment, 40 marks.
13	Unit 3 assessment, 45 marks. Half year review against the tracker.
18	Unit 4 assessment, 45 marks.
24	Unit 5 assessment, 50 marks. Finance and the final unit carry the heaviest papers of the year.
30	Unit 6 assessment, 50 marks, then the year closes with the full tracker picture: 270 assessed marks across six units.

THE REST OF THE YEAR

This is week 1 of 30. The full product contains every week of the year built to this standard: 60 taught lessons, six assessed units with mark schemes, six question banks, all 30 retrieval starters, and the editable Word and PowerPoint files. It is sold with a 14 day money back guarantee.
