TEACHER GUIDE DRAFT

Junior Cycle Business Studies (NCCA)

Cash flow and budgets

Strand 2: Enterprise
2.11 Cash flow; 2.12 Cash account and budget;
Strand 1 · 1.12–1.13 Financial position

A revision lesson. Pupils run a car dealership in firms of four and revise cash flow and budgets on their own deals. Seat each firm together. Each firm answers the topic tasks together.

What pupils do

Every pupil buys and sells cars. In Firm decisions, each role has its own job.

CEO

Staff · Sabotage from Round 2

Finance

Capital & Loans · Investments

Sales & Marketing

Marketing

Operations

Seasonal stock

Topic tasks

Each firm gets its own figures. The method is the same. Your Live screen shows each task and every firm's answer.

1 Profit on this deal

Round 1

They pay you in 30 days.

Profit on this deal?

Cars in the deal	**2 cars**
You buy them today, in total	**€28,000**
Prep and delivery, per car	**€300**
Customer pays in total	**€34,000**

ANSWER

€5,400

€34,000 − €28,000 − 2 × €300 = €5,400

Why: €5,400 profit, but €28,600 is out of your cash for 30 days.

2 Improve cash flow

Round 1

Your bank balance is low. Customers take 60 days to pay you.

Which two would improve your cash flow?

- **A** Ask suppliers for longer to pay
- **B** Pay suppliers early for goodwill
- **C** Buy more cars now to sell later
- **D** Give customers 90 days to pay
- **E** Ask customers to pay sooner

ANSWER

✓ Ask suppliers for longer to pay
✓ Ask customers to pay sooner

Why: Cash comes in sooner or goes out later; the other three take cash out sooner.

3 Forecast in order

Round 2

You fill in next month's cash flow forecast.

In what order do you work it out?

- **A** It becomes next month's opening balance
- **B** Net cash flow: cash in minus cash out
- **C** Add it to the opening balance
- **D** That gives the closing balance

ANSWER

1. **Net cash flow: cash in minus cash out**
2. **Add it to the opening balance**
3. **That gives the closing balance**
4. **It becomes next month's opening balance**

Why: Net cash flow first; add the opening balance; the closing balance carries over.

Topic tasks

4 Month-end balance

Round 2

A two-month deal.

Balance at the end of month 1?

Set aside for this deal	**€25,000**
Month 1: you buy the cars	**€49,500**
Month 1: customer deposit	**€11,500**
Month 2: rest of the price	**€45,500**

ANSWER

−€13,000

€25,000 − €49,500 + €11,500 = −€13,000

Why: Month 1 is short by €13,000. Month 2 brings €45,500.

5 Cash now or later

Round 3

Your bank balance is low. A taxi firm pays €30,000 today; a hire firm pays €31,000 in 90 days.

Which deal should you take, and why?

A The taxi firm: €30,000 today

B The hire firm: €31,000 in 90 days

ANSWER

✔ The taxi firm: €30,000 today

Why: With cash short, money today matters more than €1,000 more in 90 days.

6 Month-end balance

Round 3

They pay half in month 2.

Balance at the end of month 2? Minus allowed.

Set aside for this deal	**€15,000**
Month 1: you buy the cars	**€42,000**
Running costs, each month	**€400**
Customer's price	**€53,000**

ANSWER

-€1,300

€15,000 − €42,000 − 2 × €400 + €26,500 = −€1,300

Why: Month 2 is still short: the other half comes in month 3.

Final questions

Each pupil answers 6 final questions. Pick the question topic “Cash, profit and VAT”: the 6 come from these 10 questions.

Then each pupil writes one short answer: “Explain one way your firm could avoid a cash shortage.”

1. You bought a used hatchback for €8,400 and sold it to a customer for €10,400. VAT is 23/123 of the margin. How much VAT does this sale leave to pay?
   ✔ **€374**

2. This round your firm sold three vehicles. The margins were €1,500, €3,300 and a loss of €600. How much VAT does the round's return ask for?
   ✔ **€897**

3. Your firm has sold cars this round but has not filed the VAT return yet. Where does the VAT you owe show?
   ✔ **As a debt in the net position until the return is filed and paid**

4. A customer pays your firm €12,000 for a car that cost you €9,800. Who pays the VAT on this sale to Revenue?
   ✔ **Your firm, out of the price it received, when it files the return**

5. You sold a van for €15,000 that cost €11,700. What is left of the margin after the VAT on this sale?
   ✔ **€2,683**

6. Your firm owes €1,122 of VAT this round and files the return late. The late charge is €125. What does the late return cost in total?
   ✔ **€1,247**

7. Cash €150,000, stock at cost €40,000, a loan of €25,000 and unpaid VAT of €1,200. What is the net position?
   ✔ **€163,800**

8. Your cash went up by €10,400 when a customer paid for a car that cost €8,400. How much of that cash is not really yours to spend?
   ✔ **The VAT on the margin, €374, which is owed to Revenue**

9. You sell two scooters to customers: one bought for €2,100 and sold for €2,600, one bought for €2,400 and sold for €2,700. How much VAT do the two sales leave?
   ✔ **€149**

10. The VAT return opens in the final 90 seconds of the round. Your firm has €2,600 of VAT to pay and €1,900 in cash. What happens if you file now?
    ✔ **The return cannot be paid in full; the firm needs €700 more cash before it files**
