TEACHER GUIDE

Pearson Edexcel International GCSE in Business (4BS1)

External influences

Section 1
1.5 Business and the international economy; 1.6 Government objectives; 1.7 External factors

A revision lesson. Pupils run a car dealership in firms of four and revise external influences on their own deals. Seat each firm together. Each firm answers the topic tasks together.

The lesson

What pupils do

Every pupil buys and sells cars. In Firm decisions, each role has its own job.

CEO

Staff · Sabotage from Round 2

Finance

Capital & Loans · Investments

Sales & Marketing

Marketing

Operations

Seasonal stock

Topic tasks

Each firm gets its own figures. The method is the same. Your Live screen shows each task and every firm's answer.

1 Rates and car sales

Round 1

Interest rates rise. Many of your buyers pay for their cars with a loan.

What is the most likely effect on your sales?

- **A** Sales fall as loans cost more
- **B** Sales rise as savers earn more
- **C** Sales rise as prices fall
- **D** No change: buyers need cars

ANSWER

✓ Sales fall as loans cost more

Why: Higher interest makes loans dearer, so fewer people buy on credit.

2 Unemployment rises

Round 1

Unemployment in your area rises sharply.

Which two effects on your firm are most likely?

- **A** More buyers want premium models
- **B** Higher wages to keep staff
- **C** Banks lend more freely
- **D** Fewer buyers for new cars
- **E** More buyers want cheaper cars

ANSWER

✓ Fewer buyers for new cars
✓ More buyers want cheaper cars

Why: Less income means fewer big purchases, and buyers trade down.

3 Rate rise effects

Round 2

The Bank of England raises interest rates.

Put the effects in order, first to last?

- **A** Your sales fall
- **B** You order fewer cars
- **C** Fewer people buy on credit
- **D** Car loans cost more each month

ANSWER

1. Car loans cost more each month
2. Fewer people buy on credit
3. Your sales fall
4. You order fewer cars

Why: Dearer loans, fewer buyers, lower sales, so you buy less stock.

Topic tasks

4 Import cost rise

Round 2

The pound falls. Your parts come from Europe.

Rise in the parts' cost a month, in £?

Parts each month, in euros	**€12,000**
£1 buys, before	**1.20**
£1 buys, now	**1.00**

ANSWER

£2,000

€12,000 ÷ 1.00 − €12,000 ÷ 1.20 = £2,000

Why: A weaker pound buys fewer euros, so imports cost more in pounds.

5 Euro or UK supplier

Round 3

£1 buys €1.10. For the same order, a UK supplier asks £10,000; a German one asks €11,550.

Which supplier should you use, and why?

A The UK supplier

B The German supplier

ANSWER

✔ **The UK supplier**

Why: €11,550 ÷ 1.10 = £10,500, so the UK order is £500 cheaper.

6 Staff real income

Round 3

Prices in the shops rise 8% this year. Your staff get a 3% pay rise.

What happens to their real income?

A It rises by about 11%

B It rises by about 3%

C It falls by about 5%

D It stays the same

ANSWER

✔ **It falls by about 5%**

Why: Pay rises more slowly than prices, so it buys about 5% less.

Final questions

Each pupil answers 6 final questions on external influences. They come from these 12 questions.

Then each pupil writes one short answer: “Explain how a new law could change your costs.”

1. A dealer wants out-of-hours customer booking and demand data by time slot. Which online-booking outcome meets both aims?
   ✔ **Easy customer booking, plus time-slot demand data for managers**

2. How is a rise in interest rates most likely to affect a dealership with a variable-rate loan?
   ✔ **Interest payments may rise, raising costs**

3. Unemployment rises sharply in the local area. What is one likely effect on a dealership selling mainly to local households?
   ✔ **Demand may fall as households have less income**

4. Why must a motor retailer consider employment law when recruiting staff?
   ✔ **It must treat applicants fairly and lawfully**

5. Consumer confidence rises and more households feel secure about major purchases. What may happen to demand for cars?
   ✔ **Demand is likely to rise**

6. Local unemployment rises: more technicians apply, but demand for premium servicing weakens. Which response is most balanced?
   ✔ **Recruit needed skills and update forecasts for weaker demand**

7. A recession reduces household spending on premium cars. Which response is most appropriate?
   ✔ **Review stock and offer better value**

8. A new safety rule applies to workshop equipment. What should the business do?
   ✔ **Check compliance, update equipment, train staff**

9. The pound weakens, so an imported component costs more in sterling. What is the likely effect on a UK workshop?
   ✔ **Its input cost may rise, cutting margin**

10. A new vehicle technology makes old diagnostic equipment less useful. What business risk does this create?
    ✔ **Its equipment may become obsolete**

Final questions

11 Why should the CEO monitor economic, technological and legal changes?

✔ **They can change demand and costs**

12 In a recession the economy shrinks, unemployment rises and people spend less. A dealer sells new cars and repairs. Using this description, what should it expect?

✔ **New car sales fall more than repairs; old cars stay running**
