Product portfolio

3 Marketing (AS Level)
3.3 The marketing mix · 3.3.3 Product portfolio analysis

A revision lesson. Pupils run a car dealership in firms of four and revise product portfolio on their own deals. Seat each firm together. Each firm answers the topic tasks together.

What pupils do

Every pupil buys and sells cars. In Firm decisions, each role has its own job.

CEO

Staff · Sabotage from Round 2

Finance

Capital & Loans · Investments

Sales & Marketing

Marketing

Operations

Seasonal stock

Topic tasks

Each firm gets its own figures. The method is the same. Your Live screen shows each task and every firm's answer.

1 One-model risk

Round 1

Most of your profit comes from one model, whose market has stopped growing.

What is the main risk to your firm?

- **A** Nothing ready to replace its profit
- **B** Its price is too low
- **C** The model brings in too much cash
- **D** Too many models in growing markets

ANSWER

✓ Nothing ready to replace its profit

Why: When that model fades, nothing new is ready to take its place.

2 A balanced range

Round 1

You want a balanced range of models.

Which two should the range include?

- **A** Only models with a small share
- **B** One model for every buyer
- **C** Models in growing markets
- **D** Only models in shrinking markets
- **E** Models that bring in steady cash

ANSWER

✓ Models in growing markets
✓ Models that bring in steady cash

Why: Steady earners pay for the models that will earn in future.

3 Rank market growth

Round 2

Three of your models and their markets, sales last year and this year.

Order by market growth, fastest first?

- **A** 40,000 to 40,800 cars
- **B** 10,000 to 11,000 cars
- **C** 5,000 to 6,000 cars

ANSWER

1. 5,000 to 6,000 cars
2. 10,000 to 11,000 cars
3. 40,000 to 40,800 cars

Why: Growth: 20%, 10%, 2%.

Topic tasks

4 Growth and share

Round 2

Your model in its market.

Market growth, and your share this year?

Market sales last year	**40000 cars**
Market sales this year	**50000 cars**
Your model's sales this year	**2000 cars**

ANSWER

25% growth, 4% sh

(50,000 − 40,000) ÷ 40,000 = 25%; 2,000 ÷ 50,000 = 4%

Why: Growth compares with last year; share is of this year's market.

5 Where cash goes

Round 3

Your leader in a slow market makes spare cash. A newer model has a small share of a fast market.

Where should the spare cash go, and why?

A The newer model in the fast market

B Back into the leader that earned it

ANSWER

✓ The newer model in the fast market

Why: Cash from a mature leader is best spent building the next winner.

6 Drop the old model?

Round 3

An old model has a small share of a shrinking market and makes a small loss.

What should you most likely do?

A Use it to fund new models

B Consider dropping it

C Spend heavily to grow its share

D Cut its price to lead the market

ANSWER

✓ Consider dropping it

Why: A weak model in a shrinking market rarely pays to rescue.

Final questions

Each pupil answers 6 final questions on product portfolio. They come from these 8 questions.

Then each pupil writes one short answer: “Evaluate whether your firm should drop a loss-making model.”

1 Research shows range anxiety is the main barrier to a used-EV launch. Which campaign response is most coherent?

✔ **Show verified battery health and real ranges**

2 A premium campaign promises a two-hour turnaround, but work usually takes four hours. Strongest conclusion?

✔ **The promise is not credible yet**

3 A model’s sales have levelled off, most target customers know it, and rivals offer close alternatives. Which life cycle response is most coherent?

✔ **Defend profitable segments, refresh differentiation or plan replacement on evidence**

4 A small dealer cannot match a platform’s scale but has trusted expertise in wheelchair-accessible vehicles. Most defensible position?

✔ **Focus on the specialist niche**

5 A dealer has strong electric-vehicle expertise but weak capital reserves. Which strategic choice best uses the evidence?

✔ **A focused EV service niche at small scale**

6 A dealer group’s used-EV line has a small share of a fast-growing market. In the Boston Matrix, what is it?

✔ **Question mark**

7 Sales of a model grow fast and rivals begin to copy it. Which stage of the product life cycle is this?

✔ **Growth**

8 A model’s sales have levelled off. Which action is an extension strategy?

✔ **Launching a hybrid version**
