TEACHER GUIDE DRAFT

Leaving Certificate Business (current syllabus)

Marketing mix: promotion

Unit 5: Business in action
5.2 The marketing mix: promotion

A revision lesson. Pupils run a car dealership in firms of four and revise marketing mix: promotion on their own deals. Seat each firm together. Each firm answers the topic tasks together.

What pupils do

Every pupil buys and sells cars. In Firm decisions, each role has its own job.

CEO

Staff · Sabotage from Round 2

Finance

Capital & Loans · Investments

Sales & Marketing

Marketing

Operations

Seasonal stock

Topic tasks

Each firm gets its own figures. The method is the same. Your Live screen shows each task and every firm's answer.

1 Ad return as %

Round 1

Was the advert worth it?

Profit from the advert, as % of its cost?

The advert costs	**€3,500**
Extra sales from it	**7 cars**
Margin per car	**€1,225**

ANSWER

145%

(7 × €1,225 − €3,500) ÷ €3,500 = 145%

Why: Every €1 spent on the advert brought back €2.45.

2 Judge the campaign

Round 1

You must judge an online advert campaign.

Which two measures show its value best?

- **A** How many people saw it
- **B** Number of likes
- **C** Cost per sale
- **D** Number of clicks
- **E** Profit from the sales it brought

ANSWER

✓ Cost per sale
✓ Profit from the sales it brought

Why: Value is in sales and profit; clicks and views do not pay the bills.

3 Return on spend

Round 2

Three campaigns: what each cost, and the contribution it brought.

Order by return on spend, highest first?

- **A** €500 spent, brings €1,000
- **B** €2,500 spent, brings €3,500
- **C** €1,000 spent, brings €1,600

ANSWER

1. €500 spent, brings €1,000
2. €1,000 spent, brings €1,600
3. €2,500 spent, brings €3,500

Why: Return: 100%, 60%, 40%. The biggest profit in euros has the lowest return.

Topic tasks

4 Enquiries to profit

Round 2

Enquiries from an advert.

Profit from the advert?

The advert costs	**€3,475**
Enquiries it brings	**30 plain**
Conversion rate	**20%**
Margin per car	**€1,830**

ANSWER

€7,505

20% × 30 = 6; 6 × €1,830 – €3,475 = €7,505

Why: A 20% conversion turns 30 enquiries into 6 sales.

5 Answer a price cut

Round 3

Your firm is known for the best service in town. A rival cuts its prices by 10%.

How should you respond, and why?

A Match the 10% price cut

B Promote your service, keep prices

ANSWER

✔ Promote your service, keep prices

Why: A price war cuts every margin; promoting what makes you different keeps loyal buyers.

6 Best advert return

Round 3

Which pays back more?

Higher of the two: profit as % of cost?

Radio advert, 70 enquiries	**€4,500**
Social advert, 40 enquiries	**€4,500**
Conversion rate	**10%**
Margin per car	**€2,025**

ANSWER

215%

Radio 215%, social 80%

Why: Compare return on spend, not just profit.

Final questions

Each pupil answers 6 final questions. Pick the question topic “Promotion and campaigns”: the 6 come from these 10 questions.

Then each pupil writes one short answer: “Evaluate spending more on promotion next round.”

1 Paid search costs €2,500 and adds 20% to your next 2 sales, up to €2,000 each. A customer pays €9,000. What does the campaign add to that sale?

✔ **€1,800**

2 Paid search adds 20% to the next 2 sales, up to €2,000 each. Your two sales are €12,000 and €7,000. What is the total bonus?

✔ **€3,400**

3 Social video costs €2,000 and adds 15% to the next 2 sales, up to €1,500 each. Your sales are €8,000 and €6,000. Did the campaign pay for itself?

✔ **Yes: bonuses of €1,200 and €900 make €2,100, €100 more than the cost**

4 You book Local radio (+15% on the next 3 sales) but sell nothing this round. What does your firm get from the campaign?

✔ **Nothing: the bonus is paid on sales, and the cost is already spent**

5 Which statement about the three campaigns is right?

✔ **A campaign raises what your next sales pay, up to a cap per sale; it does not bring extra customers by itself**

6 You expect two sales of about €5,000 each this round. Paid search: €2,500, +20% on 2 sales, cap €2,000. Social video: €2,000, +15% on 2 sales, cap €1,500. Which leaves more after its cost?

✔ **Neither pays: Paid search earns €2,000 for €2,500, Social video €1,500 for €2,000**

7 Your campaign's two bonus sales are used up and the round has five minutes left. What should the Sales & Marketing Director do about marketing?

✔ **Nothing more this round: a second campaign is a new cost, and only one runs a round**

8 Local radio cost €3,000 and added €600, €450 and €750 to three sales. What did the campaign do to the firm's profit?

✔ **It lowered profit by €1,200: €1,800 earned against €3,000 spent**

9 Paid search costs €2,500 and adds 20% to two sales. Roughly what must the two sales add up to for the campaign to break even?

✔ **€12,500**

Final questions

10 Local radio costs €3,000, +15% on the next 3 sales, cap €1,500 each. Your sales are €11,000, €9,000 and €4,000. What is the bonus, and the profit on the campaign?

✔ **Bonus €3,450; profit €450**
