Leaving Certificate Business (current syllabus)

Profitability and liquidity ratios

Unit 4: Managing 2

4.4 Main profitability and liquidity ratios; 4.5.5 debt/equity

A revision lesson. Pupils run a car dealership in firms of four and revise profitability and liquidity ratios on their own deals. Seat each firm together. Each firm answers the topic tasks together.

What pupils do

Every pupil buys and sells cars. In Firm decisions, each role has its own job.

CEO

Staff · Sabotage from Round 2

Finance

Capital & Loans · Investments

Sales & Marketing

Marketing

Operations

Seasonal stock

Topic tasks

Each firm gets its own figures. The method is the same. Your Live screen shows each task and every firm's answer.

1 Current ratio

Round 1

Can they pay their bills?

Current ratio? Type the number before ":1".

Current assets	**€60,000**
Owed to suppliers	**€9,200**
Bank overdraft	**€5,800**

ANSWER

€4

€9,200 + €5,800 = €15,000;
€60,000 ÷ €15,000 = 4 : 1

Why: They hold €4 of assets for every €1 they owe soon.

2 Raise current ratio

Round 1

Your current ratio is 0.8.

Which two actions would raise it?

- **A** Swap the overdraft for a 5-year loan
- **B** Buy computers on the overdraft
- **C** Sell an unused building for cash
- **D** Use cash to buy a new ramp
- **E** Pay suppliers with cash

ANSWER

✓ Swap the overdraft for a 5-year loan
✓ Sell an unused building for cash

Why: Raise current assets or cut current liabilities, without the other moving.

3 Rank current ratio

Round 2

Three dealers: current assets and current liabilities.

Order by current ratio, lowest first?

- **A** €45,000 assets, €50,000 debts
- **B** €120,000 assets, €60,000 debts
- **C** €60,000 assets, €40,000 debts

ANSWER

1. €45,000 assets, €50,000 debts
2. €60,000 assets, €40,000 debts
3. €120,000 assets, €60,000 debts

Why: Ratios 0.9, 1.5 and 2.0.

Topic tasks

4 Net profit margin

Round 2

Last year's accounts.

Net profit margin, as a %?

Sales	**€120,000**
Cost of cars sold	**€100,800**
Overheads	**€12,000**

ANSWER

6%

€120,000 − €100,800 − €12,000 = €7,200; ÷ €120,000 = 6%

Why: Net profit is what is left after the cars and the overheads.

5 High current ratio

Round 3

Your current ratio is 3.5. Most of the current assets are cars that have not sold.

What should you do, and why?

A Cut the stock you hold

B Leave it as it is

ANSWER

✓ Cut the stock you hold

Why: Unsold stock ties up cash that could earn more elsewhere.

6 ROI as a %

Round 3

Last year's accounts.

Return on investment, as a %?

Net profit	**€42,120**
Share capital	**€84,240**
Retained profit	**€56,160**
Non-current liabilities	**€70,200**

ANSWER

20%

€84,240 + €56,160 + €70,200 = €210,600; €42,120 ÷ €210,600 × 100 = 20%

Why: Net profit was 20% of the capital employed.

Final questions

Each pupil answers 6 final questions. Pick the question topic “Profitability and liquidity ratios”: the 6 come from these 10 questions.

Then each pupil writes one short answer: “Analyse why a high current ratio is not always good.”

1 Sales €200,000 and gross profit €50,000. What is the gross profit margin?
✔ **25%**

2 Sales €180,000 and net profit €14,400. What is the net profit margin?
✔ **8%**

3 What does a current ratio of 2:1 tell you about a dealership?
✔ **€2 of current assets for every €1 owed short term**

4 Current assets €90,000 and current liabilities €60,000. What is the current ratio?
✔ **1.5:1**

5 Which ratio measures whether a firm can pay its short-term debts?
✔ **The current ratio**

6 Net profit €24,000 on capital employed of €300,000. What is the return on investment?
✔ **8%**

7 Gross profit margin stays at 20% but net profit margin falls from 8% to 3%. What should the owner look at?
✔ **Expenses, which have risen relative to sales**

8 Which ratio compares profit with the money invested in the business?
✔ **Return on investment**

9 The gross profit margin is 30% on sales of €120,000. What is the gross profit?
✔ **€36,000**

10 Current assets €100,000, including €40,000 of unsold cars; current liabilities €50,000. What is the acid test ratio?
✔ **1.2:1**
