

Strategic Tools: Ansoff & BCG

Two matrices, eight quadrants, real examples

Ansoff matrix - four growth strategies (risk rises toward diversification)

BCG matrix - the product portfolio (market growth x relative share)

Exam move

Name the quadrant, justify it with the company, then say what the firm should do next - a Question mark needs heavy investment or dropping; a Cash cow funds the Stars. Remember: Ansoff picks the growth direction; BCG decides what to do with what you already sell.
