Marketing mix: product

3.5 Marketing
3.5.4 The elements of the marketing mix: product

A revision lesson. Pupils run a car dealership in firms of four and revise marketing mix: product on their own deals. Seat each firm together. Each firm answers the topic tasks together.

What pupils do

Every pupil buys and sells cars. In Firm decisions, each role has its own job.

CEO

Staff · Sabotage from Round 2

Finance

Capital & Loans · Investments

Sales & Marketing

Marketing

Operations

Seasonal stock

Topic tasks

Each firm gets its own figures. The method is the same. Your Live screen shows each task and every firm's answer.

1 New model cash flow

Round 1

You have just launched a new model. You advertise it heavily, and few have sold.

What is its cash flow most likely to be?

- **A** Positive: no advertising needed
- **B** Positive: sales are at a peak
- **C** Negative: costs exceed sales
- **D** Zero: nothing has sold

ANSWER

✓ Negative: costs exceed sales

Why: At launch, spending on stock and adverts is high and sales are low.

2 Extension strategy

Round 1

Sales of an old model fall each month.

Which two are extension strategies?

- **A** Add new features or colours
- **B** Raise its price sharply
- **C** Sell it to a new group of buyers
- **D** Stop advertising it
- **E** Withdraw it at once

ANSWER

✓ Add new features or colours
✓ Sell it to a new group of buyers

Why: Changing the product or finding new buyers keeps its sales going.

3 Life cycle in order

Round 2

Four moments in the life of one model.

Put them in life-cycle order, first to last?

- **A** Sales rise fast; rivals copy it
- **B** Sales high but flat; many rivals
- **C** Sales fall; buyers want newer models
- **D** Few buyers know it; heavy adverts

ANSWER

1. **Few buyers know it; heavy adverts**
2. **Sales rise fast; rivals copy it**
3. **Sales high but flat; many rivals**
4. **Sales fall; buyers want newer models**

Why: Introduction, growth, maturity, decline.

Topic tasks

4 Sales growth %

Round 2

Sales of your newest model.

Growth from year 2 to year 3, as a %?

Sold in year 1	**50 cars**
Sold in year 2	**190 cars**
Sold in year 3	**285 cars**

ANSWER

50%

(285 − 190) ÷ 190 × 100 = 50%

Why: Sales still rising fast: the model is in its growth stage.

5 Extend or withdraw

Round 3

Your best-seller's sales are falling, but buyers still like its looks.

What should you do, and why?

A Extend it: new colours and kit

B Withdraw it now

ANSWER

✓ Extend it: new colours and kit

Why: Buyers still like it, so a refresh can extend its life.

6 Boston Matrix name

Round 3

Your model has the biggest share of a market that has stopped growing. It brings in steady cash.

What does the Boston Matrix call it, and why?

A Cash cow: high share, slow market

B Question mark: low share, fast market

C Star: high share, fast market

D Dog: low share, slow market

ANSWER

✓ Cash cow: high share, slow market

Why: A high share of a slow-growing market is a cash cow: it earns more than it needs.

Final questions

Each pupil answers 6 final questions on marketing mix: product. They come from these 10 questions.

1. A dealership lets customers reserve a test drive through its website. Which element of the marketing mix is most directly changed?
   ✔ **Place: the service can now be reached online**

2. A completely new vehicle-care service has just launched and few customers know it exists. Which product life-cycle stage is this?
   ✔ **Introduction**

3. A dealer promises premium service but has poorly trained staff and unreliable booking. What is the main marketing problem?
   ✔ **The mix does not match the premium position**

4. Promotion promises same-day booking, but the website shows no slots and a different price. What should the dealer fix first?
   ✔ **Make availability, price and the promise consistent**

5. The Sales lead sets a premium price but promotion promises “the cheapest basic option” and service is minimal. What is wrong?
   ✔ **Price, promotion and service clash**

6. A van model has been on sale six years. Sales have fallen three years running and a replacement is announced. Which life cycle stage is this?
   ✔ **Decline**

7. A new electric model has just been launched. What is usually true at this introduction stage of its life cycle?
   ✔ **Sales are low and promotion costs are high**

8. Sales of a popular hatchback are rising fast, and more buyers ask for it every month. Which stage of the product life cycle is it in?
   ✔ **Growth**

9. Sales of an older diesel model have fallen for three years in a row. Which stage of the product life cycle is it in?
   ✔ **Decline**

10. A family car has sold well for years. Its sales are high but have stopped rising. Which stage of the product life cycle is it in?
    ✔ **Maturity**
