TEACHER GUIDE DRAFT

Leaving Certificate Business (current syllabus)

Organising: structure and span of control

Unit 3: Managing 1
3.3 Organising: structure of organisation, span of control

A revision lesson. Pupils run a car dealership in firms of four and revise organising: structure and span of control on their own deals. Seat each firm together. Each firm answers the topic tasks together.

What pupils do

Every pupil buys and sells cars. In Firm decisions, each role has its own job.

CEO

Staff · Sabotage from Round 2

Finance

Capital & Loans · Investments

Sales & Marketing

Operations

Seasonal stock

Topic tasks

Each firm gets its own figures. The method is the same. Your Live screen shows each task and every firm's answer.

1 Matrix team problem

Round 1

Sales, finance and workshop staff form a team to launch a service. Each reports to two managers.

Which problem is most likely?

- **A** One manager's span is too narrow
- **B** Too little variety for staff
- **C** Conflicting orders from two bosses
- **D** Less sharing of ideas across teams

ANSWER

✓ Conflicting orders from two bosses

Why: In a matrix staff answer to two managers, whose demands can clash.

2 Branch power risks

Round 1

You let branch managers set prices and hire their own staff.

Which two risks does this change bring?

- **A** Local managers feel less trusted
- **B** Head office loses some control
- **C** Decisions reach branches slowly
- **D** More decisions go to head office
- **E** Branches charge different prices

ANSWER

✓ Head office loses some control
✓ Branches charge different prices

Why: Local decisions are faster, but less consistent and harder to control.

3 Rank manager cost

Round 2

Three branches: managers, their pay, and the staff they lead.

Order by manager pay per staff member, lowest first?

- **A** 6 managers on €36,000 each, 72 staff
- **B** 3 managers on €45,000 each, 27 staff
- **C** 4 managers on €40,000 each, 40 staff

ANSWER

1. **6 managers on €36,000 each, 72 staff**
2. **4 managers on €40,000 each, 40 staff**
3. **3 managers on €45,000 each, 27 staff**

Why: €3,000, €4,000 and €5,000 per staff member: wider spans cost less.

Topic tasks

4 Delayering saving

Round 2

You cut a layer of middle managers.

Net saving in year 1, after all the costs?

Managers removed	**2 staff**
Pay of each, a year	**€35,000**
One-off redundancy pay, each	**€9,000**
Pay rise, each of the 7 who stay	**€2,500**

ANSWER

€34,500

2 × (€35,000 − €9,000) − 7 × €2,500 = €34,500

Why: Year 1 carries the redundancy pay; the full saving comes from year 2.

5 Who sets prices

Round 3

Buyers complain: the same model is cheaper at another of your branches.

Who should set the prices, and why?

A Head office sets one price for all

B Each branch still sets its own prices

ANSWER

✓ Head office sets one price for all

Why: Central pricing makes every branch charge the same.

6 Fix slow approvals

Round 3

Branch staff wait days for head office to approve each discount, and they lose sales.

Which fix fits, with its main risk?

A Decentralise: branch prices may differ

B Add a layer: spans get wider

C Decentralise: decisions get slower

D Centralise further: slower replies

ANSWER

✓ Decentralise: branch prices may differ

Why: Branch decisions are quicker, but each branch may price differently.

Final questions

Each pupil answers 6 final questions. Pick the question topic “Organising: structure and span of control”: the 6 come from these 10 questions.

1 What is span of control?
✔ **The number of staff reporting to one manager**

2 A service manager has 12 technicians reporting directly to her. What is her span of control?
✔ **12**

3 A dealer group has many levels and narrow spans. What is a likely drawback?
✔ **Slow communication up and down the levels**

4 A flat structure means...
✔ **few levels and wide spans of control**

5 Which structure groups staff into sales, service and finance departments?
✔ **A functional structure**

6 A group has 1 managing director and 4 branch managers, and each branch manager has 8 staff. How many employees in total?
✔ **37**

7 Staff from sales and service are put into a project team to launch EV sales. Which structure is this?
✔ **A matrix (project team) structure**

8 Why does a business draw an organisation chart?
✔ **To show who reports to whom**

9 A manager with a wide span of control...
✔ **has many staff reporting directly**

10 Technicians need close supervision for safety. Should their manager have a wide or narrow span?
✔ **Narrow, so each person gets close attention**
