TEACHER GUIDE DRAFT

Leaving Certificate Business (current syllabus)

Sources of finance

Unit 4: Managing 2
4.1 Main sources of finance, cost of finance; 5.3–5.5 equity and loan capital

A revision lesson. Pupils run a car dealership in firms of four and revise sources of finance on their own deals. Seat each firm together. Each firm answers the topic tasks together.

What pupils do

Every pupil buys and sells cars. In Firm decisions, each role has its own job.

CEO

Staff · Sabotage from Round 2

Finance

Capital & Loans · Investments

Sales & Marketing

Marketing

Operations

Seasonal stock

Topic tasks

Each firm gets its own figures. The method is the same. Your Live screen shows each task and every firm's answer.

1 Total to pay back

Round 1

Same interest every year.

Total to pay back?

Loan	**€45,500**
Interest, each year	**3%**
Repaid over	**3 years**

ANSWER

€49,595

€45,500 + 3 × €1,365 = €49,595

Why: The loan costs €4,095 in interest.

2 Drawbacks of shares

Round 1

You plan to sell shares to pay for a second site.

Which two are drawbacks for the owners?

A The money must be repaid
B Interest to pay each month
C Profit shared out as dividends
D Less control of the firm
E It raises the firm's gearing

ANSWER

✓ Profit shared out as dividends
✓ Less control of the firm

Why: New owners share control and profit; equity has no interest or repayment.

3 Rank total interest

Round 2

Three loans, simple interest.

Order by total interest, cheapest first?

A €15,000 at 10% for 2 years
B €20,000 at 6% for 3 years
C €30,000 at 4% for 2 years

ANSWER

1. **€30,000 at 4% for 2 years**
2. **€15,000 at 10% for 2 years**
3. **€20,000 at 6% for 3 years**

Why: Interest: €2,400, €3,000, €3,600.

Topic tasks

4 Loan or shares

Round 2

Loan or new shares?

Dividends minus loan interest, a year?

Money needed	**€60,000**
Loan interest, each year	**9%**
Shares sold	**500 shares**
Dividend per share	**€20**

ANSWER

€4,600

500 × €20 − 9% × €60,000 = €4,600

Why: The shares cost €4,600 more each year.

5 Buy or lease

Round 3

You need €25,000 of diagnostic kit for two years only.

How should you get it, and why?

A Lease it

B Buy it with a loan

ANSWER

✔ Lease it

Why: Leasing avoids a big outlay for an asset you need only for a while.

6 Loan cost with fee

Round 3

Loan with a set-up fee.

Yearly cost with the fee, as a % of the loan?

Loan	**€26,000**
Interest, each year	**8%**
Arrangement fee	**€2,080**
Repaid over	**4 years**

ANSWER

10%

€2,080 ÷ 4 ÷ €26,000 = 2%; 8% + 2% = 10%

Why: The fee adds 2% a year to the rate.

Final questions

Each pupil answers 6 final questions. Pick the question topic “Loans and investments”: the 6 come from these 10 questions.

1 The Growth Facility gives €50,000 at 10% interest. How much is repaid in total?

✔ **€55,000**

2 The Stock Facility is €25,000 at 10% repaid in 2 instalments. How much is each instalment?

✔ **€13,750**

3 You borrow €10,000 on the Quick Loan (10%, one instalment) to buy a car for €10,000 that sells for €13,000. After the loan and the VAT, what is left of the deal?

✔ **€1,439**

4 Your firm took the Growth Facility: €50,000 in, €55,000 to repay. How does the loan show in the net position just after drawing it?

✔ **Cash up by €50,000, debt up by €50,000: the net position is unchanged by the draw**

5 The Flagship dealership property costs €65,000 and returns about 9% a round. About how much does it pay each round?

✔ **About €5,850**

6 You bought a property for €45,000, it paid €3,150 in one round, and you sell it back at 95%. What is the overall result?

✔ **€900**

7 Your firm has €2,000 in cash, €2,800 of VAT due in the final 90 seconds, and a car in stock priced at €9,000. What is the soundest move?

✔ **Sell the car before the return opens, or take the Quick Loan if no buyer comes**

8 You drew the Quick Loan (€10,000, 10%) and can repay now from cash. What does repaying early do?

✔ **It clears the €11,000 debt from the net position; the interest is still paid**

9 The Quick Loan is €10,000 at 10% in one instalment. What is the instalment?

✔ **€11,000**

10 You take the Stock Facility (€25,000, 10%) to buy two cars for €12,500 each and sell them for €15,000 each. After interest and VAT, does the loan pay?

✔ **Yes: margins €5,000, minus €2,500 interest, minus VAT of €934, leaves €1,566**
