TEACHER GUIDE

Pearson Edexcel GCSE (9-1) in Business (1BS0)

Market segmentation

Theme 1: Investigating small business
Topic 1.2 Spotting a business opportunity · 1.2.3 market segmentation

A revision lesson. Pupils run a car dealership in firms of four and revise market segmentation on their own deals. Seat each firm together. Each firm answers the topic tasks together.

What pupils do

Every pupil buys and sells cars. In Firm decisions, each role has its own job.

CEO

Staff · Sabotage from Round 2

Finance

Capital & Loans · Investments

Sales & Marketing

Operations

Seasonal stock

Topic tasks

Each firm gets its own figures. The method is the same. Your Live screen shows each task and every firm's answer.

1 Market share as %

Round 1

Share of the town.

Dealer's market share, as a %?

Dealer's sales, new	**77 cars**
Dealer's sales, used	**16 cars**
All sales in the town	**300 cars**

ANSWER

31%

77 + 16 = 93; 93 ÷ 300 × 100 = 31%

Why: The dealer wins 31 of every 100 cars sold in the town.

2 Why share fell

Round 1

Your market share fell from 20% to 15%, but you sold more cars.

Which two explain this?

- **A** The market shrank
- **B** You sold fewer cars
- **C** The whole market grew faster
- **D** Rivals won more new buyers
- **E** Rivals' sales fell

ANSWER

✓ The whole market grew faster
✓ Rivals won more new buyers

Why: Share is your sales over the market: the market grew faster than you.

3 Rank market share

Round 2

Three dealers: their sales and their town's sales.

Order by market share, highest first?

- **A** 300 of 2,000 cars
- **B** 450 of 5,000 cars
- **C** 120 of 600 cars

ANSWER

1. 120 of 600 cars
2. 300 of 2,000 cars
3. 450 of 5,000 cars

Why: Shares 20%, 15%, 9%: the most cars sold is the smallest share.

Topic tasks

4 Segment revenue

Round 2

Revenue in one segment.

Dealer's revenue from this segment?

Town's car sales, a year	**£300,000**
Business buyers, % of sales	**25%**
Dealer's share of them	**10%**

ANSWER

£7,500

25% × £300,000 = £75,000; × 10% = £7,500

Why: The segment is worth £75,000. The dealer takes 10% of it.

5 Niche or mass

Round 3

You are a small dealer. Six big dealers chase every buyer; no rival targets young drivers.

Which should you choose, and why?

A Sell to every buyer

B Focus on young drivers

ANSWER

✓ Focus on young drivers

Why: A small firm does best in a segment rivals ignore.

6 Market share change

Round 3

Two years compared.

Dealer's share change, in % points? Minus if below zero.

Dealer's sales, last year	**49 cars**
All sales, last year	**700 cars**
Dealer's sales, this year	**198 cars**
All sales, this year	**1100 cars**

ANSWER

11%

49 ÷ 700 = 7%; 198 ÷ 1100 = 18%; 18 − 7 = 11 points

Why: The share went from 7% to 18%.

Final questions

Each pupil answers 6 final questions on market segmentation. They come from these 17 questions.

1. A dealer sells 24 of the 120 used vans sold in its regional market. What is its unit market share?
   ✔ **20%**

2. A fleet dealer supplies 30 vans and has a 15% unit market share. What is the total number of vans sold in that market?
   ✔ **200 vans**

3. After a recall a dealer's sales fall from 24 to 18 cars in a 120-car local market. By how many percentage points does market share fall?
   ✔ **5 percentage points**

4. A dealer targets first-time drivers aged 17–24. Which segmentation basis is used?
   ✔ **Demographic segmentation by age**

5. A winter-tyre campaign is shown only to customers in colder northern areas. Which segmentation basis is this?
   ✔ **Geographic segmentation**

6. A dealership targets a premium service plan at customers in a high-income bracket. Which segmentation basis is used?
   ✔ **Income**

7. You have 36 sales in a 240-vehicle market. With the market unchanged, how many more sales reach a 20% unit market share?
   ✔ **12 vehicles**

8. Research shows families value boot space while city commuters value easy parking. What should Sales do?
   ✔ **Tailor the message to each group**

9. A dealership sells 45 of the 300 used cars sold in its town during one month. What is its unit market share?
   ✔ **15%**

10. Segmentation means splitting customers into groups with different wants, each given a suitable offer. A dealer offers families, taxi firms and delivery firms different ranges. What is it doing?
    ✔ **Segmenting: customers in groups, each with a different offer**

Final questions

11 Market share = business sales ÷ total market sales × 100. A town sells 250 used cars a month; one dealer sells 45. Using the formula, what is its share?

✔ **18%**

12 Market size is the total sales of every business in the market. Three dealers, the only ones in town, sold £180,000, £145,000 and £95,000. What is the market size?

✔ **£420,000**

13 A dealer groups its customers by the area where they live. Which basis of market segmentation is this?

✔ **Location**

14 A dealer offers small, cheap-to-insure cars to drivers aged 17 to 21. Which basis of market segmentation is it using?

✔ **Age**

15 A dealer sells only luxury cars that cost over £60,000. Which market segment is it mainly targeting?

✔ **Customers with high incomes**

16 Why does a dealer split its market into segments?

✔ **To target each group with cars and adverts that suit it**

17 A dealer runs a club for customers who enjoy off-road driving and camping. Which basis of market segmentation is this?

✔ **Lifestyle**
