Business strategy

6 Business and its environment (A Level)
6.2 Business strategy · 6.2.1 Developing business strategy

A revision lesson. Pupils run a car dealership in firms of four and revise business strategy on their own deals. Seat each firm together. Each firm answers the topic tasks together.

What pupils do

Every pupil buys and sells cars. In Firm decisions, each role has its own job.

CEO

Staff · Sabotage from Round 2

Finance

Capital & Loans · Investments

Sales & Marketing

Marketing

Operations

Seasonal stock

Topic tasks

Each firm gets its own figures. The method is the same.

1 Growth strategy

Round 1

You launch a monthly subscription service for your existing customers.

Which growth strategy is this?

- **A** A new product for new buyers
- **B** More of the same, current buyers
- **C** A new product for current buyers
- **D** Current products for new buyers

ANSWER

✓ A new product for current buyers

Why: A new service sold to the buyers you already have is product development.

2 When quality pays

Round 1

You compete with the best service and longest warranty in town.

Which two must be true for this to pay?

- **A** Buyers choose on price alone
- **B** Buyers will pay more for it
- **C** Rivals find it hard to copy
- **D** Your prices are below rivals'
- **E** Your costs are the lowest in town

ANSWER

✓ Buyers will pay more for it
✓ Rivals find it hard to copy

Why: A difference pays only if buyers value it and rivals cannot copy it.

3 Rank profit per car

Round 2

Three dealers: their price and cost per car.

Order by profit per car, highest first?

- **A** Price £24,000, cost £21,000
- **B** Price £20,000, cost £16,500
- **C** Price £18,000, cost £14,000

ANSWER

1. **Price £18,000, cost £14,000**
2. **Price £20,000, cost £16,500**
3. **Price £24,000, cost £21,000**

Why: £4,000, £3,500, £3,000: the cheapest dealer earns most per car.

Topic tasks

4 Lowest-cost plan

Round 2

A plan to have the lowest costs in town.

New profit per car?

Price per car now	**£18,500**
Cost per car now	**£15,500**
Price cut	**2%**
Cost cut	**10%**

ANSWER

£4,180

£18,500 × 98% − £15,500 × 90% = £4,180

Why: Lowest costs let you price below rivals and still earn more per car.

5 Where to grow

Round 3

Your share of the local market is 40%, and the market has stopped growing.

Where should you grow, and why?

A In a new region

B Harder in the local market

ANSWER

✓ In a new region

Why: In a flat market where you hold 40%, more sales must come from rivals.

6 Stuck in the middle

Round 3

Your costs are above the discount dealer's, and your service is no better than rivals'.

What is the main risk to your firm?

A Too many buyers to serve

B Rivals copy your service

C Low profit: no edge on cost or service

D High profit from mixing both

ANSWER

✓ Low profit: no edge on cost or service

Why: With no cost lead and no clear difference, profit is squeezed.

Final questions

Each pupil answers 6 final questions on business strategy. They come from these 10 questions.

1. A dealer aims to raise market share without cutting its gross profit margin. Which measure best tests both parts?
   ✔ **Compare market share and gross margin with the previous period**

2. A dealer group swaps 'grow quickly' for 'open two profitable North West branches by December 2028'. Why is this objective stronger?
   ✔ **It is specific, measurable and time-bound, so progress can be tested**

3. A dealer group seeks fast regional growth, but its owners also require a minimum liquidity buffer. Strongest planning approach?
   ✔ **Pair the growth target with a cash limit; test scenarios**

4. A border delay halts a critical parts supplier for ten days. Which response separates immediate continuity from longer-term resilience?
   ✔ **Prioritise scarce parts and tell customers now; review suppliers later**

5. A cyber incident disables online workshop bookings. Which operational priority is strongest?
   ✔ **Use a tested manual route; restore safely**

6. An edited video of a sales talk goes viral before the firm knows the full context. Best first public response?
   ✔ **State verified facts and promise an update**

7. A fire closes the group's highest-revenue branch. Which decision principle is strongest in the first 24 hours?
   ✔ **Protect people and keep services going**

8. An online marketplace connects many sellers directly with buyers. Which Five Forces effect most threatens a weakly differentiated traditional dealer?
   ✔ **Buyer power and rivalry may rise**

9. A small dealer cannot match a platform’s scale but has trusted expertise in wheelchair-accessible vehicles. Most defensible position?
   ✔ **Focus on the specialist niche**

10. A dealer has strong electric-vehicle expertise but weak capital reserves. Which strategic choice best uses the evidence?
    ✔ **A focused EV service niche at small scale**
