Sources of finance

5 Finance and accounting (AS Level)
5.2 Sources of finance · 5.2.2 Internal and external sources of finance

A revision lesson. Pupils run a car dealership in firms of four and revise sources of finance on their own deals. Seat each firm together. Each firm answers the topic tasks together.

What pupils do

Every pupil buys and sells cars. In Firm decisions, each role has its own job.

CEO

Staff · Sabotage from Round 2

Finance

Capital & Loans · Investments

Sales & Marketing

Marketing

Operations

Seasonal stock

Topic tasks

Each firm gets its own figures. The method is the same.

1 Total to pay back

Round 1

Same interest every year.

Total to pay back?

Loan	**£45,500**
Interest, each year	**3%**
Repaid over	**3 years**

ANSWER

£49,595

£45,500 + 3 × £1,365 = £49,595

Why: The loan costs £4,095 in interest.

2 Drawbacks of shares

Round 1

You plan to sell shares to pay for a second site.

Which two are drawbacks for the owners?

A It raises the firm's gearing
B The money must be repaid
C Profit shared out as dividends
D Interest to pay each month
E Less control of the firm

ANSWER

✓ Profit shared out as dividends
✓ Less control of the firm

Why: New owners share control and profit; equity has no interest or repayment.

3 Rank total interest

Round 2

Three loans, simple interest.

Order by total interest, cheapest first?

A £15,000 at 10% for 2 years
B £20,000 at 6% for 3 years
C £30,000 at 4% for 2 years

ANSWER

1. **£30,000 at 4% for 2 years**
2. **£15,000 at 10% for 2 years**
3. **£20,000 at 6% for 3 years**

Why: Interest: £2,400, £3,000, £3,600.

Topic tasks

4 Loan or shares

Round 2

Loan or new shares?

Dividends minus loan interest, a year?

Money needed	**£60,000**
Loan interest, each year	**9%**
Shares sold	**500 shares**
Dividend per share	**£20**

ANSWER

£4,600

500 × £20 − 9% × £60,000 = £4,600

Why: The shares cost £4,600 more each year.

5 Buy or lease

Round 3

You need £25,000 of diagnostic kit for two years only.

How should you get it, and why?

A Lease it

B Buy it with a loan

ANSWER

✔ **Lease it**

Why: Leasing avoids a big outlay for an asset you need only for a while.

6 Loan cost with fee

Round 3

Loan with a set-up fee.

Yearly cost with the fee, as a % of the loan?

Loan	**£26,000**
Interest, each year	**8%**
Arrangement fee	**£2,080**
Repaid over	**4 years**

ANSWER

10%

£2,080 ÷ 4 ÷ £26,000 = 2%; 8% + 2% = 10%

Why: The fee adds 2% a year to the rate.

Final questions

Each pupil answers 6 final questions on sources of finance. They come from these 8 questions.

1. A new used-car retailer needs £80,000 for stock; its owner wants full voting control. Which source fits best?
   ✔ **A secured bank loan, if repayments can be met**

2. A workshop needs a vehicle lift for five years, with predictable payments and no obsolete asset to own afterwards. Which finance fits?
   ✔ **A lease matching the term and expected use**

3. The CFO must finance long-lived workshop equipment but keep overdraft capacity free for daily needs. Strongest principle?
   ✔ **Fund long-term assets with long-term finance**

4. A dealer needs £20,000 for six weeks between buying stock and selling it. Which source of finance fits best?
   ✔ **A bank overdraft**

5. A £60,000 loan is repaid over five years at £1,250 a month. What is the total interest paid?
   ✔ **£15,000**

6. An investor offers £150,000 for 30% of a dealership's shares. What value does this put on the whole business?
   ✔ **£500,000**

7. A profitable dealer buys a new ramp from last year's profits rather than borrowing. What is the main advantage?
   ✔ **No interest to pay and no loss of control**

8. A parts supplier lets the dealer pay for a delivery 30 days after receiving it. Which source of finance is this?
   ✔ **Trade credit**
