Pearson BTEC Level 3 National Extended Diploma in Business (601/7160/1)

Revenue, costs and profit

Unit 3: Personal and Business Finance
E2 Costs; F1 Statement of comprehensive income

A revision lesson. Pupils run a car dealership in firms of four and revise revenue, costs and profit on their own deals. Seat each firm together. Each firm answers the topic tasks together.

The lesson

What pupils do

Every pupil buys and sells cars. In Firm decisions, each role has its own job.

CEO

Staff · Sabotage from Round 2

Finance

Capital & Loans · Investments

Sales & Marketing

Marketing

Operations

Seasonal stock

Topic tasks

Each firm gets its own figures. The method is the same.

1 Variable unit cost

Round 1

Split the costs.

Variable cost per car?

Total costs, a month	**£52,350**
Fixed costs, a month	**£4,750**
Cars sold	**4 cars**

ANSWER

£11,900

(£52,350 − £4,750) ÷ 4 = £11,900

Why: Take the fixed costs off first. Then share the rest between the cars.

2 Why profit fell

Round 1

Revenue rose 10% this year, but profit fell.

Which two could explain this?

A Fixed costs jumped this year
B Overheads fell
C Variable costs rose faster
D Prices were raised
E More cars sold at the same margin

ANSWER

✓ Fixed costs jumped this year
✓ Variable costs rose faster

Why: Profit falls when costs grow faster than revenue.

3 Statement in order

Round 2

You read your statement of comprehensive income from the top.

Put these in order, top first?

A Revenue
B Expenses
C Gross profit
D Profit for the year

ANSWER

1. Revenue
2. Gross profit
3. Expenses
4. Profit for the year

Why: Revenue less cost of sales is gross profit; less expenses is profit for the year.

Topic tasks

4 Profit for the year

Round 2

Year-end figures.

Profit for the year?

Revenue	**£149,700**
Cost of sales	**£61,000**
Expenses	**£48,000**
Interest paid	**£2,700**

ANSWER

£38,000

£149,700 − £61,000 − £48,000 − £2,700 = £38,000

Why: Gross profit is £88,700; expenses and interest take it to £38,000.

5 Costs or revenue

Round 3

Revenue is £200,000 and costs £180,000. Raise prices so revenue rises 5%, or cut costs 5%?

Which raises profit more, and why?

A Cut costs by 5%

B Raise revenue by 5%

ANSWER

✔ **Raise revenue by 5%**

Why: 5% of £200,000 is £10,000; 5% of £180,000 is £9,000.

6 Profit next year

Round 3

Next year's plan.

Profit next year? Minus allowed.

Revenue	**£105,000**
Revenue rises by	**20%**
Costs	**£66,000**
Costs rise by	**25%**

ANSWER

£43,500

£126,000 − £82,500 = £43,500

Why: Revenue and costs both change. Work out each new figure first.

Final questions

Each pupil answers 6 final questions on revenue, costs and profit. They come from these 11 questions.

1 A car supermarket records revenue of £1,260,000 and cost of sales of £945,000. What is its gross profit?
✔ **£315,000**

2 A workshop pays £12,000 monthly rent plus £35 for each safety inspection completed. Which cost description is correct?
✔ **Rent is fixed in the relevant range; inspection cost is variable**

3 A workshop pays £14,000 a month in rent and salaries plus £38 of parts per service. With 250 services, what are total costs?
✔ **£23,500**

4 A dealer pays sales staff a basic monthly wage plus commission on each car sold. How is this staff cost best described?
✔ **Semi-variable: a fixed and a variable part**

5 A dealership's accountant produces a statement of comprehensive income for the year just ended. What does that statement show?
✔ **Income and costs over the period, ending in profit or loss**

6 A workshop has fixed costs of £18,000 a month and variable costs of £60 per service. With 300 services, what are total costs?
✔ **£36,000**

7 A dealer’s month: revenue £84,000, fixed costs £25,000, variable costs £41,000. What is the profit?
✔ **£18,000**

8 A dealer sells 40 cars at £9,500 each. Each car cost £8,200 and fixed costs are £30,000. What is the month’s profit?
✔ **£22,000**

9 Which cost of a dealership is a variable cost?
✔ **Fuel to prepare each car sold**

10 A repair chain’s total costs are £240,000 for 400 services. What is the average (unit) cost of a service?
✔ **£600**

Final questions

11 A dealer’s revenue is £1,000,000, cost of sales £820,000 and other expenses £110,000. What is gross profit?

✔ **£180,000**
