COURSE

Pearson Edexcel International GCSE in Business (4BS1)

External influences

Section 1 · 1.5 Business and the international economy; 1.6 Government objectives; 1.7 External factors

Revision for Section 1: each firm works it out on its own deals.

Class	Topic
Pearson Edexcel International GCSE Business (4BS1)	**External influences**

THE LESSON

Setup — 2 min

Round 1 — Decisions 3 min · Deals 5 min · Topic tasks 4 min

Firm decisions	Deals	TASK 1 Rates and car sales	TASK 2 Unemployment rises

Round 2 — Decisions 3 min · Deals 5 min · Topic tasks 4 min · B2B deal 2 min

Firm decisions	Deals	TASK 3 Rate rise effects	TASK 4 Import cost rise	B2B deal

Round 3 — Decisions 3 min · Deals 5 min · Topic tasks 4 min · B2B deal 2 min

Firm decisions	Deals	TASK 5 Euro or UK supplier	TASK 6 Staff real income	B2B deal

Final questions — 3 min

45-minute setting shown. The 30-minute setting has one topic task per round (Tasks 3, 5 and 6) and one B2B deal. 60 and 75 add more deals.

Each step

Firm decisions	Each role makes its decision on its own page.
Deals	Each pupil trades with a classmate in another firm.
Topic task	The firm answers together. Everyone presses Agree.
B2B deal	One firm sells a lot of cars to another firm.
Final questions	Each pupil answers six questions.

Firm decisions

CEO	**Staff**	Hire staff. Each costs a salary and gives one benefit.
	Sabotage FROM ROUND 2	Hit a rival firm's cash, at a cost. A Legal Counsel blocks it.
Sales & Marketing	**Marketing**	Book one advert campaign to lift the next sales.
Finance	**Capital & Loans**	Borrow cash. The firm pays it back with interest.
	Investments	Buy property or funds. The value can rise or fall.
Operations	**Buying**	Hire the Procurement Specialist or the Stock Controller for the round.

B2B deal · Rounds 2 and 3

One firm sells a lot of 3 cars to another firm (4 in Round 3). With an odd number of firms, two firms offer to sell and the lower price wins.

Topic tasks

Each firm gets its own figures. The method is the same for every firm.

Task 1

ROUND 1

Interest rates rise. Many of your buyers pay for their cars with a loan.

What is the most likely effect on your sales?

PICK ONE

- ○ No change: buyers need cars
- ✔ **Sales fall as loans cost more**
- ○ Sales rise as prices fall
- ○ Sales rise as savers earn more

Why: Higher interest makes loans dearer, so fewer people buy on credit.

Task 2

ROUND 1

Unemployment in your area rises sharply.

Which two effects on your firm are most likely?

PICK TWO

- ○ Banks lend more freely
- ✔ **Fewer buyers for new cars**
- ○ Higher wages to keep staff
- ✔ **More buyers want cheaper cars**
- ○ More buyers want premium models

Why: Less income means fewer big purchases, and buyers trade down.

Task 3

ROUND 2

The Bank of England raises interest rates.

Put the effects in order, first to last?

PUT THESE IN ORDER, FIRST TO LAST · RIGHT ORDER

1. **Car loans cost more each month**
2. **Fewer people buy on credit**
3. **Your sales fall**
4. **You order fewer cars**

Why: Dearer loans, fewer buyers, lower sales, so you buy less stock.

Task 4

ROUND 2

The pound falls. Your parts come from Europe.

Rise in the parts' cost a month, in £?

WORK OUT THE NUMBER, THEN PICK IT · EXAMPLE FIGURES

Parts each month, in euros	**€12,000**
£1 buys, before	**1.20**
£1 buys, now	**1.00**

METHOD

Rise = euros ÷ new rate − euros ÷ old rate

€12,000 ÷ 1.00 − €12,000 ÷ 1.20 = £2,000

Why: A weaker pound buys fewer euros, so imports cost more in pounds.

Task 5

ROUND 3

£1 buys €1.10. For the same order, a UK supplier asks £10,000; a German one asks €11,550.

Which supplier should you use, and why?

PICK A OR B AND GIVE A REASON

- ○ The German supplier
- ✔ **The UK supplier**

Why: €11,550 ÷ 1.10 = £10,500, so the UK order is £500 cheaper.

Task 6

ROUND 3

Prices in the shops rise 8% this year. Your staff get a 3% pay rise.

What happens to their real income?

PICK ONE

- ✔ **It falls by about 5%**
- ○ It rises by about 11%
- ○ It rises by about 3%
- ○ It stays the same

Why: Pay rises more slowly than prices, so it buys about 5% less.

Final questions

6
questions for each pupil

159
Level 2 Business questions

12
of them on external influences

The game draws 6 questions on this topic.

1 A dealer wants out-of-hours customer booking and demand data by time slot. Which online-booking outcome meets both aims?
Easy customer booking, plus time-slot demand data for managers.

2 How is a rise in interest rates most likely to affect a dealership with a variable-rate loan?
Interest payments may rise, raising costs.

3 Unemployment rises sharply in the local area. What is one likely effect on a dealership selling mainly to local households?
Demand may fall as households have less income.

4 Why must a motor retailer consider employment law when recruiting staff?
It must treat applicants fairly and lawfully.

5 Consumer confidence rises and more households feel secure about major purchases. What may happen to demand for cars?
Demand is likely to rise.

6 Local unemployment rises: more technicians apply, but demand for premium servicing weakens. Which response is most balanced?
Recruit needed skills and update forecasts for weaker demand.

7 A recession reduces household spending on premium cars. Which response is most appropriate?
Review stock and offer better value.

Final questions

8 A new safety rule applies to workshop equipment. What should the business do?
Check compliance, update equipment, train staff.

9 The pound weakens, so an imported component costs more in sterling. What is the likely effect on a UK workshop?
Its input cost may rise, cutting margin.

10 A new vehicle technology makes old diagnostic equipment less useful. What business risk does this create?
Its equipment may become obsolete.

11 Why should the CEO monitor economic, technological and legal changes?
They can change demand and costs.

12 In a recession the economy shrinks, unemployment rises and people spend less. A dealer sells new cars and repairs. Using this description, what should it expect?
New car sales fall more than repairs; old cars stay running.
